Dear Tim

Re: First Six Months

Just a quick note to let you know that for the first time all three of our indoor pool complexes had no Micros detected on our last health department check. That's 12 different samples across 5 different plants ranging from spa's, therapy pools, learners pools and lap pools. We attribute the clear micro reading to the installation of the Anti Bio system.

I confess that I still do not understand how the technology is effective but I am no longer a sceptic. Customer feedback has commented on improved pool hall atmosphere, improved clarity and pool tests indicate a reduction in combined chlorine. We are very happy with the results the installations have been able to provide and the maintenance free components that the system incorporates.

Thanks again

Yours sincerely
