To Whom It May Concern

The Cairns Colonial Club Resort has been utilising the Anti Bio System since September 1999. Due to our year round swimming season as well as a constant presence of suntan lotion and body oil, we were interested to see if the Anti Bio System would reduce our chemical costs as well as solve the cloudiness of the pools due to oil build-up.

We are still on the Anti Bio System, which has not only reduced our chemical expenditure but has also given the pools an exceptional level of clarity.

I believe the Anti Bio System enhances all aspects of swimming pool maintenance, in so much as the chemicals are more effective, the filters are more efficient and additional equipment operates with less maintenance.

I would say the biggest advantage of the Anti Bio System is that it can be set up on any system with a minimal amount of intrusion and ongoing attention. It gives 24/7 benefits without any maintenance and at minimal cost.

Anti Bio Technologies Ltd. has excellent after sales service and also supplies continual updates on their products and research.

I would have no hesitation in recommending the Anti Bio System.

Yours sincerely,

Paul Stein
Pool Maintenance (11 years).
