Dear Mark

Re Anti Bio Installation

After trialing the ANTI BIO system on our swimming pool at Mandalay luxury beachfront apartments I thought it was worth noting some significant changes that occurred.

Initially we noticed the pH of the water to stabilize and therefore required far less acid to neutralise, as a result of this our pool water kept it shine for longer periods and we had numerous guest comments as to the look and feel of the water.

During high use periods eg school holidays previously we lost the clarity of the water which required the addition of many extra chemicals, since the Anti Bio system has been installed the pool water has kept its shine and not required these costly additions.

I must say I found it hard to be convinced initially as to how the system would benefit our pool water but can confidently say that the results now speak for themselves.
We have now also installed the system to another property we manage and recommend Anti Bio with confidence.

Regards

Warwick Bourguignon
