Port Douglas QLD 4871

Dear Mark

On behalf of Outrigger Resorts Port Douglas we would like to thank you and your staff for service that In the Clear Pool and Spa have given us over the past 3 years. Your experience in water health and safety and plant equipment is outstanding and is highly valued by Outrigger Resorts Port Douglas.

On your recommendation Outrigger trialed the anti bio system on two of our pools over a three month period and found the results very pleasing.

Anti Bio provides an unconditional guarantee on equipment, and provides a program that will meet and ensure all health and safety requirements. This has been shown to us by Anti Bio and you're self.

Outrigger Resort Port Douglas was installed with an Anti Bio system in October 2004. Once the system was installed we have found that large reduction in chemical use. Water clarity has improved which has been commented on by our guests staying at the resort. Pool maintenance labour time is down and a large volume of treaded water being backwash has also been reduced.

Outrigger Resorts Port Douglas has also recommended the Anti Bio System to be installed to other Outrigger Resorts in Queensland.

In summary I highly recommend this system to be installed to not only large hotel pools but also to the domestic market.

Kind Regards

David Darrington
