### TO WHOM IT MAY CONCERN

*The "Anti-Bio" system was installed in our 25 metre – 8 lane pool in August 1999.*

*At first I was very sceptical to say the least, but was willing to give it a fair chance to prove itself.*

*After 12 months, I can say that there is an improvement in water clarity and that overall chemical usage is down, especially chlorine, where we are using 40-50% less over the 12 month period. This is a great saving in chemical costs over a year.*

*Backwashing of the filters takes less time and uses less water.*

*I would recommend the "Anti-Bio" system for commercial size swimming pools and feel that it would be money well spent.*

*Please do not hesitate to contact me at the College should you require more information.*

*Yours sincerely,*

*David Haynes  
Pool Maintenance Officer*
