Mr Tim Briglia  
Customer Service and Administration  
Anti Bio Technologies Ltd  
PO Box 600 Ashmore City  
Qld 4214

Dear Sir

The ABS 2000 Anti Bio device was fitted to our 25 X 12 metre indoor pool in February 2004 and has operated without fault since then.

Staff, students and other users of the pool have commented on the cleanliness and clarity of the water and the softer feel of it.

Back wash times reduced very quickly after installation and has remained consistently lower ---this has resulted in less water wastage and operator time.

Pool balance and stability has improved and chlorine use [and costs] has reduced somewhat but at this stage we are not able to quantify the reduction due to a long term problem with our automatic dosing equipment.

I believe the Anti Bio has markedly improved the quality of water in our pool and have found Anti Bio Technologies staff great to deal with. I would recommend the device as a worthwhile addition to any pool treatment system.

Yours sincerely

Roger Reed  
Facility Manager
