Anti Bio Technologies Ltd  
PO Box 600  
ASHMORE CITY QLD 4214

Dear David,

Following a discussion with your sister Yvonne, I would like to confirm by way of testimonial the clarity of the water at St Hilda's School pool complex.

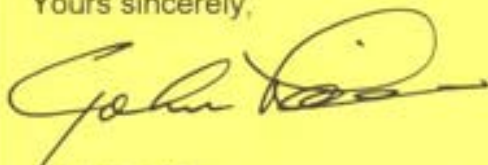

Our club has been swimming there from October to April since 1995. Many swimmers including myself have an aversion to the potential toxic effects of chlorine. Until recently learning of your technology regarding the treatment of water I was always curious why we could spend the whole morning swimming without the residual chlorine smell on the skin, in some pools lasting for days.

Many of our swimmers leave St Hilda's pool without showering for the above reasons.

Recently we visited another swimming club venue on the Coast and without exception everyone's eyes were red rimmed with some requiring treatment such as eye drops.

We would hope that some day all pools will be treated by your methods for all to benefit.

Yours sincerely,

John Laidlaw  
President
