Anti Bio Technologies
P O Box 600
ASHMORE CITY 4214

To Whom It May Concern:

A "Anti Bio" system was installed on our 25m pool in October 1999. The system was installed for a demonstration and evaluation period of 6 months.

The evaluation of the system has been extremely positive with the most significant areas of improvement being:-

- reduction of chlorine usage by some 50% (calcium hypochlorite)
- less maintenance of filter system (less backwashing)
- swimmers and instructors have commented on the improved quality and clarity of the water

I would highly recommend the use of this product and have had no hesitation in proceeding with its permanent deployment at this school.

Yours faithfully
