Carl Pavett  
Anti Bio Technologies  
PO Box 3447  
Erina 2251

Dear Carl,

I would like to take this opportunity to thank you for your introduction to the Anti Bio technology range. We have recently conducted a three month trial with the Cellar Control system and have had some very pleasing results. To date we have noticed the following benefits

1. Cleaning procedures have gone from a weekly occurrence to a six week cycle. This has allowed us to purchase the system and return our investment after 6 months.
2. The cleaning procedures are now easier to complete
3. Better quality beer
4. Less growth of bio film

After completing the three month trial we have purchased the system. It has been a worthwhile investment which we can highly recommend.

Recently there was a sales representative from a major beer company staying at our resort. He commented on the quality of the beer and congratulated our staff on there maintenance procedures. This again proves the success of your technology on our resort.

Best Regards

Mick Carah  
Assistant General Manager
